

# Your Canva AI 2.0 Prep Checklist

*Before Canva AI 2.0 is fully live, here's what we recommend having in place:*

**Brand Kit is complete** — colors, fonts, logos, and imagery assets are all present and accurate

**About Me / Memory Library is set up thoughtfully**, with real detail about your team and how you work

**Top 5–8 recurring formats exist as proper, reusable templates** (not just saved one-off designs)

**File naming and folder structure is consistent and findable** by your whole team

**Connectors (Slack, Gmail, Drive, Calendar) are authorized** and ready to use

**Affinity-to-Canva pipeline is defined** (if you use both tools)

**The whole team understands what "never start from scratch" means** in practice
